Prices valid 2008

SHARK NET is a concentrated blend of Glucosamine & Chondroitin Sulfate with MSM, Ascorbic Acid & Manganese, APVMA listed product No: 62643.

BEWARE, any product claiming to contain Glucosamine or Chondroitin or making claims that it can help improve joint health or function is considered a Veterinary Medicine and **MUST** be registered with the APVMA. If not there is no control over manufacture, quality or ingredients and it is illegal to sell or supply. Always look for the APVMA product number on the label.

Dose Rate: 80mg/kg body weight. For an average 500 kg horse the initial dose rate is 20g (1 large scoop) mixed in feed twice daily for 25 days or until improvement in condition is noted. This dosage delivers 10,000 mg Glucosamine, 4,000 mg Chondroitin and 16,000 mg MSM per day, along with synergistic levels of Manganese and Ascorbic Acid. A maintenance dose of 32mg/kg body weight may then be followed. Give 8g (2 small scoops) twice daily (16g per day) for a 500 kg horse. This dose delivers 4,000 mg Glucosamine, 1,600 mg Chondroitin and 6,400 mg MSM per day.

Prior to & during competition or periods of physical stress or as required depending on severity of symptoms or condition, return to larger dose rate.

"As trainers we have many responsibilities. One is to the horses, to give them the best possible care available. Another is to our owners, to get the maximum potential out of their horses in a cost effective way. I have no time for gimmicks or fads, I use systems and products that I know work and give the best possible results.

Freedman Brothers Racing has used the Shark Net formula on all our best horses since 2005, both as a preventative and treatment. It delivers quality joint care that gives me the results I demand without having to resort to risky medications."

Lee Freedman, Freedman Brothers Racing

"Shark Net has the advantage of incorporating an adequate level of high quality Chondroitin and Glucosamine with MSM, coupled with its universal palatability, and cost-effectiveness. My experience over the last three years leaves me no doubt that, given prophylactically, horses joints last longer on this product than without it."

Dr John Walker BVSc
